

**A pap smear.
To check your cervix.**

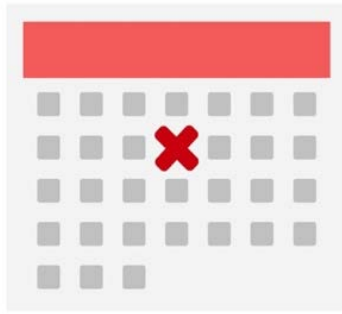

Your body is made up of cells.
Sometimes your cells get sick.
This is called cancer.

Most women have a cervix.
It is inside your body.

Your cervix may have a germ.
This germ can make cancer grow.

You can check your cervix.

You do this every 5 years.

It helps you stay well.

You are more than 24 years old

And

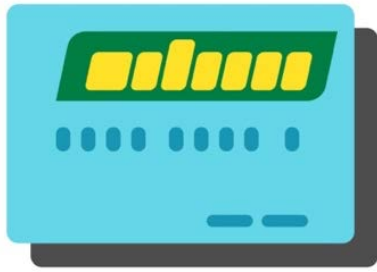

Less than 75 years old. Like you are 45.

You can have the test.

The test is not free.

You have to pay.

You have a Medicare card.

You pay less.

Book a test

- Talk to your doctor

Or

- Go to a health centre.

You want to know more.
